EQUIPMENT FEES

GSRWA has a variety of equipment to serve the needs of water and wastewater systems. While salaries for GSRWA staff to provide technical assistance to systems are underwritten by grants and federal contracts, the Association must charge fees to maintain our inventory of equipment. For example, an acoustic leak detector can cost between \$2,000-4,000. A 3 Pod SoundSens Leak Correlator costs approximately \$11,000. These fees help us defray the costs to purchase, maintain, and replace our equipment and help to serve you better! Equipment fees cover up to one day of service (5 onsite hours) unless otherwise specified. Deployment fees are charged for correlators, the borehole camera and the GSRWA drone in order to cover the wear and tear of transport and equipment setup.

Water & Wastewater Equipment	Deployment Fee	Usage Fee
• Leak Hunter		\$25
• Correlator	\$100	\$75
• Borehole Camera	\$100	\$150
• Hydro Flow Test		\$100
• Pipe Locator		\$25
• Sewer Camera		\$400
• Smoke Testing Set Up Fee (system is responsible for purchasing the liquid smoke)		\$100
• Sludge Densimeter		\$25

Mapping Fees*	
Laminated Printed Copy of 24"x36" Map	\$150

*If you are interested in a mapping project, a detailed scope of work will be developed.

Equipment	Deployment Fee	Usage Fee
Drone Photography Services**	\$150	\$200

**Contact us for a detailed scope of work for drone services, including prices for still photos and videos.

Manage your assets with Granite State Rural Water's UAV Drone Services.

Unmanned Aerial Systems

Unmanned Aerial Systems (UAS) have come to the forefront in many industries over the past few years. Their use in the environmental field has taken hold with no signs of slowing down. This ever expanding technology allows us to perform operations in less time, with less liability, and with more frequency. Granite State utilizes this technology to perform operations for water and wastewater systems around New Hampshire.

Our Drone UAV Services

- Infrastructure inspections
- Shoreline inspections and mapping
- Watershed inspections
- Source Water Protection Area inspections
- High-resolution imagery (photo-mosaic and video)
- Smoke Testing
- Remote leak detection

Contact us to find out how we may serve your needs.
